

# INTOCERAMICS

**Uncovering Value in  
Mineral Waste**

**Company Overview**

# We Support You from Start to Finish

## Laboratory Analysis

Analyze and evaluate your bulk material to determine potentially exploitable minerals for extraction and processing.

## Formulation & Testing

Process and blend minerals derived from your source material and test their effectiveness as raw materials for ceramics.

## Pilot Scale Validation

Test the process developed for your source material, producing pilot scale batches for evaluation by potential end users.

## Process Design & Construction

Design manufacturing processes, specify equipment, and represent you during all phases of construction and start-up.

## Plant Operation & Optimization

Apply six sigma lean manufacturing, build teams, and develop plant culture to optimize operations and performance.

## Commercial Viability

Leverage network of industry decision makers to introduce your product to the market and find commercial outlets.

**If You Have...**

**An Imminent Waste Challenge**

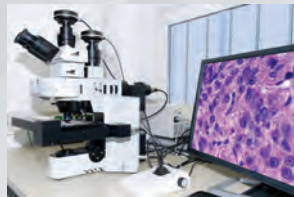

**Excessive Disposal and Landfill Costs**

**Uncertain Economics of Undeveloped Minerals**

**Social and Environmental Impact Opportunity**

## **We Are Your Ceramics Expert Partner**

If there's a commercial opportunity hidden in your waste stream, we'll help you find it.

**Uncover the  
Possibility**

**Formulate the  
Recipe**

**Deliver the  
Value**

**Bryan**

**Geary**

**Carl**

**Sorrell**

70+ years  
of combined  
experience  
in analysis,  
production,  
and plant  
management.
